Project:

Group Project - (Group you have formed for PC2 projects)
Deadline - 12:00 PM, 7,Sept 2021
Deliverables :
1. Code
2. Presentation deck

Presentation is for 10 mins

Technical Project:
1. Connect the application that you have developed in PC (NUS money app) to the metamask using web3.
2. Create a button TOKENS in the application. When you click on the button , display the number of tokens in the metamask account.
3. Push your code to Git and post the link in LumiNUS.
4. Give a recommendation on how the tokens you have created can be used in real time.
5. Create a presentation deck explaining the use case . Deck should have a maximum of 8 slides.
6. Upload the slides and code to LuminNUS.

   Tips:
   1. Use the smart contract developed in the class as the backend.
   2. Deploy it in the test network (ropsten). Use the ABI in your JS code to connect to metamask.
